Objective

Full-stack developer with hands-on experience building web applications, database-driven systems, automation workflows, and AI-powered tools. Experienced in frontend and backend development, database design, API integration, testing, debugging, and system architecture. Focused on translating requirements into practical software and refining solutions based on user and stakeholder feedback.

Experience

- Richwell Colleges Incorporated** Oct 2025 - May 2026
Full Stack Software Developer Intern
 - Developed and maintained full-stack applications based on project requirements and stakeholder feedback.
 - Designed database schemas, data flows, and application architecture for system features.
 - Contributed to technology and architecture planning throughout development.
 - Tested, debugged, and refined applications to improve correctness, usability, and reliability.
 - Built and refined automation workflows to support organizational processes.
 - Maintained and upgraded software following deployment.
- Remote/ Freelance** 2023 - 2026
Software developer freelancer
 - Built customized software solutions ranging from sales and inventory systems to academic and business applications.
 - Developed full-stack features based on client and project requirements.
 - Improved user interfaces and workflows based on feedback.
 - Designed database structures and application logic for project-specific requirements.
- Lexie Staffing and Business Consulting** 2022 - 2023
Recruitment Associates
 - Supported end-to-end recruitment, including job postings, screening, and interview coordination.
 - Maintained candidate information and records in an ATS.
 - Prepared recruitment documents, offer letters, and onboarding materials.
 - Generated recruitment reports and metrics for HR decision-making.

Education

- Richwell colleges Incorporated** 2022 - 2026
Bachelor of Science in Information Systems
1.6 GWA
- Felizardo C Lipana National High School** 2020 - 2022
Senior High (STEM)
With Honor

Skills

- Frontend: React, Typescript, Next.js, Javascript, HTML, CSS, Tailwind CSS, Astro
- Backend: Python, Django, PHP, Laravel, Express.js, C#, Asp.net REST APIs
- Databases: MySQL, Supabase, Firebase, MongoDB, Postgresql
- AI & Automation: RAG, AI, n8n, API integration, Workflow Automation
- IOT: ESP32, C++, RFID
- Tools & Deployment: Git, GitHub, Vercel, Render Serverless Functions

Projects

- Automation Pick-up Service**
 - Full-Stack •Automation •API Integration

Automated a service-request workflow by integrating application data google sheets and notifications reducing repetitive manual tracking and coordination

- **Academic Compliance and Audit Portal**

- Full-Stack •Database •Workflow System

Built a centralized academic workflow for managing OJT documentation, compliance records, and audit processes

- **RFID Iot Membership Scanner**

- Esp32 •Cpp •Supabase •n8n

Built an RFID-based membership check-in system with offline queue support, clouds synchronization, and automated notifications

- **TagForge**

- Next.js •React •AI •Stripe

Built an AI-powered seo platform that automates metadata generation and content optimization

- **Tropang AI**

- Rag •AI •Document •Processing

Built a RAG-based assistant that turns pdf and organizational documents into a searchable ai knowledge base
