Objective

IT Support & Data Analyst with hands-on experience in database-driven applications, SQL, REST APIs, system troubleshooting, and workflow automation. Experienced in investigating application and data issues, designing database structures, testing and debugging systems, and integrating APIs to improve business processes. Strong technical foundation in software development with a focus on practical problem-solving, system reliability, and clear communication with users and stakeholders.

Experience

- Richwell Colleges Incorporated** Oct 2025 - May 2026
Full Stack Software Developer Intern
 - Developed and maintained database-driven applications based on organizational requirements and stakeholder feedback.
 - Designed database schemas, data flows, and application logic for system features and business processes.
 - Investigated application issues, tested functionality, debugged errors, and refined systems to improve reliability and usability.
 - Worked with APIs and external services to support system integrations and automated workflows.
 - Built automation workflows that reduced repetitive manual processes and improved operational efficiency.
 - Collaborated with team members and stakeholders to identify requirements, troubleshoot technical issues, and deliver system improvements.
 - Maintained and updated deployed applications while addressing issues identified during use and testing.
- Remote/ Freelance** 2023 - 2026
Freelance Software developer
 - Built customized database-driven applications for sales, inventory, academic, and business workflows.
 - Developed backend functionality, REST APIs, database structures, and application logic based on project requirements.
 - Investigated and resolved application errors through testing, debugging, and data inspection.
 - Designed and optimized workflows to improve data handling, reporting, and operational processes.
 - Integrated external APIs and automation services to synchronize data and reduce repetitive manual work.
 - Improved system usability by incorporating client and stakeholder feedback into application features.
- Lexie Staffing and Business Consulting** 2022 - 2023
Recruitment Associate
 - Supported end-to-end recruitment, including job postings, screening, and interview coordination.
 - Maintained candidate information and records in an ATS.
 - Prepared recruitment documents, offer letters, and onboarding materials.
 - Generated recruitment reports and metrics for HR decision-making.

Education

- Richwell colleges Incorporated** 2022 - 2026
Bachelor of Science in Information Systems
1.6 GWA
- Felizardo C Lipana National High School** 2020 - 2022
Senior High (STEM)
With Honor

Skills

- Database & Data: SQL, MySQL, PostgreSQL, Firebase, Database Design, Data Investigation
- APIs & Backend: REST APIs, API Integration, PHP, Laravel, Python, Django, Node.js, Express.js
- IT & System Support: Application Troubleshooting, Technical Troubleshooting, Debugging, Testing, LAN/

Network Fundamentals, DNS, DHCP

- Frontend: JavaScript, TypeScript, React, Next.js, HTML, CSS, Tailwind CSS
- Automation & Tools: n8n, Workflow Automation, Git, GitHub, Vercel, Render
- AI & Other: AI API Integration, RAG, ESP32, C++
- Business Analysis: Requirements Gathering, Process Analysis, Workflow Design, Stakeholder Communication

Projects

- **Automation Pickup Service**
 - Node.js •Express.js •Google Sheets API •Nodemailer
 - Automated inventory and service-request workflows by integrating application data with Google Sheets and email notifications.
 - Reduced administrative overhead by 90% by replacing manual spreadsheet tracking with automated synchronization and notifications.
- **Academic Compliance & Audit Portal**
 - Javascript •Firebase •Firestore •Tailwind CSS
 - Built a centralized system for OJT documentation, student records, compliance tracking, and auditing.
 - Digitized manual record-keeping and reduced advisors' manual auditing workload by 80%
- **Fitness CRM & Progress Tracking Dashboard**
 - Django •Python •PostgreSQL •Chart.js
 - Built a database-driven management system for tracking customer information, subscriptions, metrics, and progress.
 - Designed backend data structures and reporting functionality to replace manual record management.
- **RFID Iot Membership Scanner**
 - ESP32 •C++ •Supabase •n8n •Telegram API
 - Built an RFID-based membership validation system integrated with a cloud database and automated notifications.
 - Implemented offline queue support to prevent data loss during connectivity interruptions.

Achievements & Awards

- 3rd place - Hackathon Competition Team Adobong Palaka, BSIS Week 2026 , march 2026
- Vice president - CODE IS, Programming Club Creative organization of digital explorers in information systems 2025
- Research Presenter - 1st Computing, ICT , and Emerging Technologies Research Colloquium Richwell colleges inc. June 2026
- 3rd place - Chess, BSIS Tournament BSIS Week 2026 March 2026
